Pet's Name	<input type="checkbox"/> Dog <input type="checkbox"/> Cat	<input type="checkbox"/> Male <input type="checkbox"/> Female Last heat cycle _____	Age
Owner's Last Name	Owner's First Name	Cell Phone	Emergency Contact
Owner's Street Address	City	State	Zip Code
Email Address			
Pet's Breed (cats if breed unknown Domestic Short Hair or Domestic Long Hair)		Pet's Color	

**Operation:SNIP Inc. uses qualified staffing & approved materials for all procedures performed. It is important for you to understand that the risk of injury or death, although extremely low, is always present, just as it is for humans who undergo surgery.**

**Carefully read, & ensure you understand, the following before signing your name:**

- I, acting as owner or agent of the pet named above, hereby request and authorize Operation:SNIP Inc, through whomever veterinarians they may designate, to perform an operation for sexual sterilization of the animal named on the above portion of this form.
- I understand that the operation I have elected presents some hazards, and that injury to, or death of, an animal may conceivably result, for there is some risk in the procedure, and some risk in the use of anesthetics and drugs provided for the procedure.
- I understand for sterilization at Operation:SNIP my pets must be between the age of 3 months and over 3 lbs and must be no older than 6 years and under 100 lbs.
- I understand that I must bring in proof of rabies vaccination or Operation:SNIP will vaccinate against rabies and you will be charged for rabies vaccine. The Pinellas County license fee is \$20 for 1 year and \$40 for 3 years.
- I understand the inherent risks of failing to maintain current vaccinations and waive all claims arising out of, or connected with, the performance of this operation due to such failure. I understand that if my pet develops kennel cough after surgery, I am responsible for treatment at my own cost.
- I certify that my animal is in good health and, if an adult, has had no food since 12:00 midnight the evening prior to surgery.
- I understand that Operation:SNIP has the right to refuse service to any animal to whom surgery is deemed a health risk,
- I understand that Operation:SNIP will perform a complete physical examination before surgery is performed, and that my animal will not receive pre-operative bloodwork at Operation:SNIP. If I choose for my pet to have such bloodwork, I understand that it must be performed at a full-service veterinary clinic.
- I understand that some factors significantly increase surgical risk, including, but not limited to, pregnancy, *heat*, and diseases such as feline immunodeficiency virus (FIV), feline leukemia (FeLV), and heartworms.
- I understand that if my female dog/cat is pregnant, the pregnancy will be terminated at surgery and there will be an additional charge of \$20(cats) or \$50 (dogs).
- I understand that if my animal has an open umbilical hernia it will be repaired at the time of surgery at an additional charge of \$20(cats) or \$40(dogs).
- I understand that if my animal is cryptorchid (retained testicle) there will be \$30 charge for cats and a \$50 charge for dogs per testicle.
- Operation:SNIP scans all animals, if a microchip is found It will be your responsibility to contact previous registered owner.
- I understand that if I do not retrieve my pet(s) at the agreed upon pick up time, your pet will be considered abandoned and Operation:SNIP will turn the pet(s) over to Pinellas County Animal Services.
- If at time of physical exam our Veterinarian detects a heart murmur we will continue with the surgery if it is a mild heart murmur and I understand there is more risk involved with this procedure. If it is a severe heart murmur we will decline the animal for surgery.
- I hereby release Operation:SNIP Inc, which includes Directors, Veterinarians, Certified Veterinarian Technicians, Veterinarian Technician Assistants, Volunteers, and all employees from any and all claims arising out of, or connected with, the performance of this procedure or any adverse reactions from vaccinations. I agree that I have not and will not claim any right of compensation from them, or any of them, or file action by reason of such sterilization or attempted sterilization of such animal or any consequences related thereto. Owner/agent hereby agrees to indemnify and hold Operation:SNIP Inc.harmless for any damages caused during the transportation of the animal, or for any damages caused by any unforeseeable events including fire, vandalism, burglary, extreme weather, natural disasters, or acts of God.

**YOUR ANIMAL WILL RECEIVE A SMALL SPAY/NEUTER TATTOO ON HIS/HER UNDERSIDE TO SHOW THAT HE/SHE HAS BEEN STERILIZED.**

**IF YOUR PET HAS FLEAS EXPECT AN ADDITIONAL CHARGE : CATS REVOLUTION \$16 DOGS CREDELIO \$20**

- DOGS ONLY: I HAVE PROOF OF A NEGATIVE HEARTWORM TEST WITHIN THE LAST YEAR,**
- I AGREE TO HEARTWORM TEST MY DOG WITH OPERATION:SNIP I WILL RECEIVE ONE MONTH OF PREVENTATIVE AND TESTING FOR AN ADDITIONAL FEE.**

**Female dogs only: My female dog is not in heat and has been over her last heat cycle for at least two weeks. I understand that there is a higher surgical risk associated with the spay of a dog who is currently in heat. I understand that if my dog is in heat there will be an additional charge of \$40.00.**

- I agree  I disagree

By signing you acknowledge that you have read and understand this form.

PICK UP IS TODAY BETWEEN 3-4 PM

# Post-Operative Instructions

Operation:SNIP Inc.

13489 Walsingham Rd.

Largo, Florida

727-595-1983

operationsnipfl@gmail.com

## POST-OPERATIVE INSTRUCTIONS

1. No running, jumping, playing, swimming, or other strenuous activity for 7 to 10 days. Keep your pet quiet. Pets must be kept indoors where they can stay clean, dry, and warm. No baths during the recovery period. Dogs must be walked on a leash.
2. Check the incision site twice daily. There should be no drainage. Redness and swelling should be minimal. Do not allow your pet to lick or chew at the incision. All dogs receive an Elizabethan collar that MUST be worn
3. to prevent additional licking and chewing that could cause infection and disturb sutures.
4. If your dog had a scrotal castration, they may have small amounts of drainage/discharge for up to three days.
5. Appetite should return gradually within 24 hours of surgery. Lethargy lasting for more than 24 hours post-op, diarrhea, or vomiting are not normal and your pet should be taken to your regular veterinarian. Dogs may have a slight cough for a few days after surgery.
6. Do not change your pet's diet at this time, and do not give them junk food, table scraps, milk, or any other *people food* during the recovery period. This could mask post-surgical complications.
7. Operation:SNIP uses a buried absorbable suture, unless otherwise noted, your pet also received a green tattoo near the incision site, this is done to easily detect that the animal has been sterilized.
8. Operation:SNIP will treat at our clinic, at minimal cost, any post-op complications resulting directly from the surgery, if the above post-op instructions are followed in full. Your regular veterinarian must address illnesses or injuries that are not a direct result of surgery. Please call for an appointment as soon as you see cause for concern. We cannot be held responsible for complications resulting from failure to follow post-op instructions, or for contagious diseases for which the animal was not previously properly vaccinated.
9. If there are any questions or concerns directly related to the surgery during the recovery period, please call this office at 727-595-1983. **If there is an emergency after hours, contact either your regular veterinarian or Tampa Bay Veterinary Specialist and Emergency Care Center at 1501 S Belcher Rd. Largo, Florida 33771 call 727-531-5752.**

Pain medication was given to your pet at the time of surgery, please follow any further instructions for pain or anxiety medications sent home with your pet.

---

**Today while your pet was at Operation:SNIP our staff observed or diagnosed your pet with the following Issues: Diarrhea / loose stool Fecal positive/negative Hookworms Roundworms Whipworms Coccidia Tapeworms Live Fleas Flea dirt Ear Cytology positive/negative Ear mites**  
**Your Pet has dewormer to go home, please follow instructions**
